State		Time:	
Main & Major	Fix/Create Web posting bot	State	

#### Last Response

You will automate the scraping, cleaning, and parsing of food data and online retail data, as defined in our spec docs which we will share through private chat. This code should be integrated and pushed into our Database. Future work will also involve backend data pipeline automation work.

All code should be written in Python unless you have received prior written approval to write in any other language.

Go

Field	Data Type	Description	Significant	Affect other pages
Project name	string	Name of the project or a place holder if the name is not given yet	For all users related to the project as a part of the project development	No
